

# Downtown: Game Rules Update 1

## Setting up the Game

Downtown: Place 7 Gangster Cards in the Downtown location (instead of only 5 cards).

## Playing the Game

**Bank:** The token of the player who is buying Gangster Cards at the Downtown location will not be ignored when dividing the money if that player also has a token at the Bank!

Example: Player Red has a token at the Downtown location and at the Bank. Also Player Yellow has a token at the Bank. Player Red buys Gangster Cards at a value of \$7,000 and pays the \$7,000 into the Bank. Then Player Red and Player Yellow both receive \$3,000 out of the Bank. The rest of \$,1000 stays in the Bank.

If only Player Red has a token at the Bank, Player Red may purchase the Gangster Cards for free, but must possess at least the \$7,000.

**Phase 4:** If the current player has more than 7 cards in his hand at the end of his turn (or 10 Cards if that player has a token at Don Massimo`s Villa) and must reduce cards, he cannot discard cards onto the Gangster Card discard pile; he can only place them into his own display area.
